

## Non-NHS Service Fees

The charges for services we can provide which are **not part of the NHS service**.

### What you are paying for

These are services which are not within the NHS contract and therefore must be paid for by the patient or requesting organisation. What can be perceived as a relatively simple request (a simple letter or authorised signature on a form for example) will in fact require a significant amount of time and serious consideration by clinical and administration professionals in their processing.

We rightly take our clinical responsibilities very seriously and will not rush any matter.

### Prices

These are inclusive of any applicable VAT, and will be invoiced **before** work is carried out. Please note they must be paid **before** any work will take place and prices are non-negotiable.

### Estimated Time frames

We aim to handle requests as efficiently as possible. All requests are subject to the clinical practitioners availability and in light of seasonal clinical services demand. Larger or complex pieces of work, insurance reports, medical reports and firearms assessments are estimated to take in the region of +/- one calendar month.

You may enquire of the estimated completion time prior to paying for any work.
